DETAILED ACTION

1. Claims 1-6 are pending in the application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The terms "57# kraft liner," and "33# flute" in claim 6 is unclear which renders the claim vague and indefinite. It is unclear what the numbers refer too, i.e. a trademark or specific composition.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clough et al. (U.S. Patent No. 6,050,412) in view of Kupersmit (U.S. Patent No. 4,663,207).

Art Unit: 1772

Clough discloses a container made from a metallized polyester film, a kraft liner, a flute layer and another kraft liner (*figure 2*).

The limitation “for shipping temperature sensitive or perishable goods” is deemed to be a statement with regard to the intended use and is not further limiting in so far as the structure of the product is concerned. In article claims, a claimed intended use must result in a ***structural difference*** between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. MPEP § 2111.02. Furthermore, Clough discloses that container if for shipping flowers (*title*), which flowers are deemed to be a perishable good.

Clough fails to disclose a double walled structure.

Kupersmit discloses a corrugated shipping container (*col. 1, lines 34-58*) with triple wall reinforcement to increase compressive strength threats (*col. 1, line 14-31*).

It would have been obvious to one of ordinary skill in the art at the time of the invention to use triple wall reinforcement as taught by Kupersmit in Clough in order to improve strength compressive stresses.
